6th July 2020

Dear Parent/Carer

As you will be aware the Government have released further Guidance to schools in relation to being ready to open in September. This is a complex document and the return to school requires significant planning. The Aspire Federation have already begun the planning process.

Currently we can confirm that we are expecting the majority of children, young people and staff to return to school in September, with the only exceptions being those who have received medical advice to stay at home. Detailed plans will be confirmed over the next two weeks.

As you will appreciate we are working to make sure our plans are as effective and detailed as possible. This involves again reviewing what we do in school and revisiting risk assessments. It is also possible that the government and local authority may issue additional guidance over the next few weeks which will need to be considered.

As soon as we are in a position to share further information we will be in touch updating you.

Thank you in advance for your patience.

Yours sincerely

Mrs S Allen
Head of School
